SUMMARY

I am an aspiring web developer making a career transition from kitchen design in order to seek new challenges and learn new things. I recently graduated from the Juno College of Technology's immersive web development bootcamp, where I acquired the skills necessary to build beautiful, accessible, and responsive websites according to current best practices. Not only did I gain a deep understanding of languages like HTML, CSS, and JavaScript, I also discovered my true passion. Programming is to me more than a new career, it is a vocation, a magical portal to a wider world, and a way for me to make an impact on that world.

I am passionate about science and technology, curious about the nature of things, and always meticulous in my work. Please give me a chance to show you what we can create together.

PROJECTS

Design Conversion

🔗 https://deluxe-custard-17d504.netlify.app/

HTML5 | CSS3| SCSS | JavaScript

- Converted a static design into a fully responsive and accessible multi-page website that is optimized for all screen sizes and devices
- Communicated with designer to suggest adjustments to the design to enhance accessibility and readability of text

Project 2

📅 Date period   📍 Location

🔗 URL

Short summary of your work

- What was a successful outcome of your work? (e.g. Raised $3,000 for the charity)

Project 3

📅 Date period   📍 Location

🔗 URL

Short summary of your work

- What was a successful outcome of your work? (e.g. Raised $3,000 for the charity)

SKILLS

HTML5 | CSS3 | JavaScript ES6

SCSS | React.js | Firebase

Responsive Design | Git & GitHub

Web Accessibility Requirements

RESTful APIs | Debugging

Paired Programming | Teamwork

Project Scope Management

English | Mandarin Chinese
